

# Notes on {Medley}<internal>test>

## <test> subdirs:

admin, ARs, env, GC, IO , LANGUAGE, Library, loops, lyric, Maiko, tools

## <test>Top level files

**README.TEDIT** (this file)

**TEST-RESULTS** (contains log from running AUTO tests from 1988)

**DOT.read-me-first** (originally .read-me-first)

## <test>4045> Deleted

## <test>Maiko>

Subdir AUTO, OBSOLETE

Top level files moved to OBSOLETE

**STACKHAX** (has CHECKSTACKSPACE, seems to get tangled up in it's own stack)

**STACKTAKESHI** (seems to cause a stack overflow on opurpose, which leaves stack clean enough that URAID hard-reset recovers from. Suspect timeouts aren't correct)

**BAD-XREF** (no compiled file)

**display.cl** (says "from Texas Instruments")

subdirs moved <ARs **optests** & .dfasl (**AuxHAND**

**ENDLESSPUSHES** **AR-TEST-CASES.Auto-log**

## <test>Maiko>AUTO>

**OPCODES.TEST**

**OPCODES.DFASL**

may need EXPORTS.ALL to compile

most tests succeed

test BITBLT-DIAGONALS and BITBLT-SLOPED-LINES fail

A little hard to debug because the inspector for 2D

Another cop y of **bbtests** and **optests.lisp**

## <test>Maiko>OBSOLETE>

Probably incorporated into AUTO>

**AREF-TESTER**

**ARRAY-TESTER.TEST**

**FLOAT-TESTER**

**MAIKO-UNWIND-TESTS**

**TESTER** (compiled OK)

**unwindtest**  
**xclopcodetests**

**<test>Library>**

4045xlpstream> RS232 deleted  
 CASH-FILE> only hand  
 GCHAX>Auto>  
 HASH-FILE> only HAND  
 MatMult>Auto>  
 TEdit>Hand-Aux> samples to TEdit  
 WHERE-IS> only

**<test>loops>**

**LOOPS-SETUP.TEDIT**  
**LOOPS-TESTER-....** files

**test>Lyric>**

(old-versions of **DO-TEST .dfasl** and **.tedit**)

**<test>Tools>**

**AUTOTEST.TEDIT** (originql AUTOTEST.TEDIT-orig)  
**AUTOTEST & .DFASL** framework for running tests

**DO-TEST & .DFASL** (copied newer version from Medley  
 internal/library)

**DO-TEST.TEDIT** on Writing Software Tests  
 (many other files not reviewed yet)
